

Patient questions on follow-up after Upper Gastro-intestinal Surgery (part of the RESTORE study)

Thank you for taking the time to answer the questions below. We are trying to understand the common symptoms people experience after major surgery to the oesophagus and stomach and also their perspectives on follow-up after surgery. Your participation is greatly appreciated.

Please circle appropriate answers (all answers will be treated confidentially)								
Initials (option	al):							
Date of surgery (Month/year rather than exact date) :								
Hospital where	e surgery took p	lace ?						
Chemotherapy	in addition to s	surgery ?	Y / N					
Radiotherapy in addition to surgery ? Y / N								
How long were you followed-up for at the hospital where you had your surgery?								
1month	6months	12 months	2 years	5years	longer			
lf you were fol	llowed-up at and	other hospital fr 12 months	-		, for how long ?			

	d the follow-up	mainly?							
Surgeon	Oncologist	Gastroenterologist	Dietitian	Nurse (CNS)	Other				
Did you see a d	lietitian routine	ly as part of follow-	up beyond the first բ	oost-op appointr	nent ? Y /				
Did you have a	ny additional fo	ollow-up apart from	that with your GP?						
Telephone consultations Email follow-up			Other						
How happy we	re you with the	Follow-up you rece	ived (please circle) ?						
12345678910									
	Very unhappy			Extremely happ	ру				
Ideally, how lo		hoose to be followe	d up after surgery?	Extremely happ	ру				
Ideally, how lo 1month			d up after surgery? vears 5years		ру				
	ng would you c				Dy				
1month Apart from the	ng would you c 6months	12 months 2 y		longer post-operative					

Ν

We are interested in studying the following symptoms that commonly occur after oesophagectomy or gastrectomy. Please indicate whether you believe the symptom is important (Y/N) and whether any additional symptoms should be included. You do NOT need to have experienced the symptom itself to judge it to be important and are welcome to select all of them if you wish. Please place a "X" in the appropriate box

Symptom	Important Y/N ?		Symptom	Important Y/N ?	
	Yes	No		Yes	No
Experienced change in smell			Pain around your bottom		
Experienced change in taste			Abdominal bloating/distension		
Bad breath/halitosis			Excessive passing of wind from your bottom		
Difficulty swallowing liquids			Stomach/abdominal gurgling		
Difficulty swallowing solids			Need to rush to open bowels		
Belching or burping			Feeling that you have not emptied your bowel properly		
Heartburn or acid regurgitation			Leakage/ soiling or lack of control of the bowel		
Feeling full after small amount of food			Mucus in the stool		
Reduced appetite			Greasy, pale or oily stool		
Hiccups			Bleeding from your bottom		
Nausea/feeling sick			Itchiness around the bottom		
Vomiting/being sick/retching			Woken from sleep to have bowels open		
Abdominal cramps/trapped wind			Tiredness/lethargy		
Upper abdominal pain/discomfort			Dizzy / light headed after meals		
Lower abdominal pain/discomfort			Bowel frequency / consistency		
Weight loss					
Any other symptoms you feel are important ?					

Thank you for your time. Please send your reply either by email (a scanned document or this word file) to Andrew.davies1@gstt.nhs.uk or by post to Andrew Davies, Consultant Surgeon, Dept of General surgery, East Wing link corridor, St Thomas hospital, London, SE1 7EH

Thank you for your time
